

**BUSINESS  
ENERGY  
EFFICIENCY**  
Cambridge &  
Peterborough

## BACKGROUND

Bridgeway Security Solutions, based just north of Cambridge, are an information security partner that enables business transformation with mobility, cloud security and security intelligence solutions. The office is in excellent condition and a substantial amount of energy efficiency work has already been undertaken with respect to lighting and heating.

## ACTIONS

Bridgeway Security Solutions contacted BEE to identifying further improvement opportunities and following a site visit it was recommended that they replace their existing air conditioning cooling units with more appropriately sized smaller capacity units. The company swiftly applied for a grant to enable them to take the recommendations forward and just six weeks after their initial enquiry Bridgeway were in receipt of a grant offer for £2,645.

## RESULTS

The new air conditioning units will reduce overall energy consumption and running costs, saving an estimated £1,800 per annum and delivering a carbon saving of 5 tonnes each year.

COST SAVING	CARBON SAVING	GRANT RECEIVED
£1,800	5 TONNES	£2,645

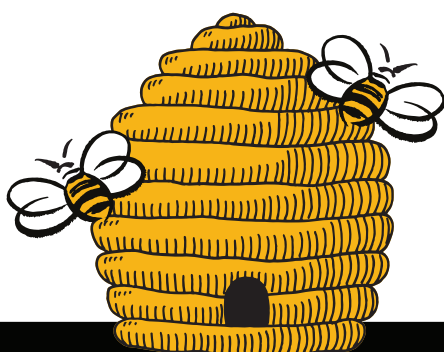

*"Thanks to the grant received from BEE, we've been able to install new air conditioning units. This has led to energy efficient improvements along with significant cost savings to our business."*
